BodyARMOUR

X-RAY PROTECTION APRON

UniRay

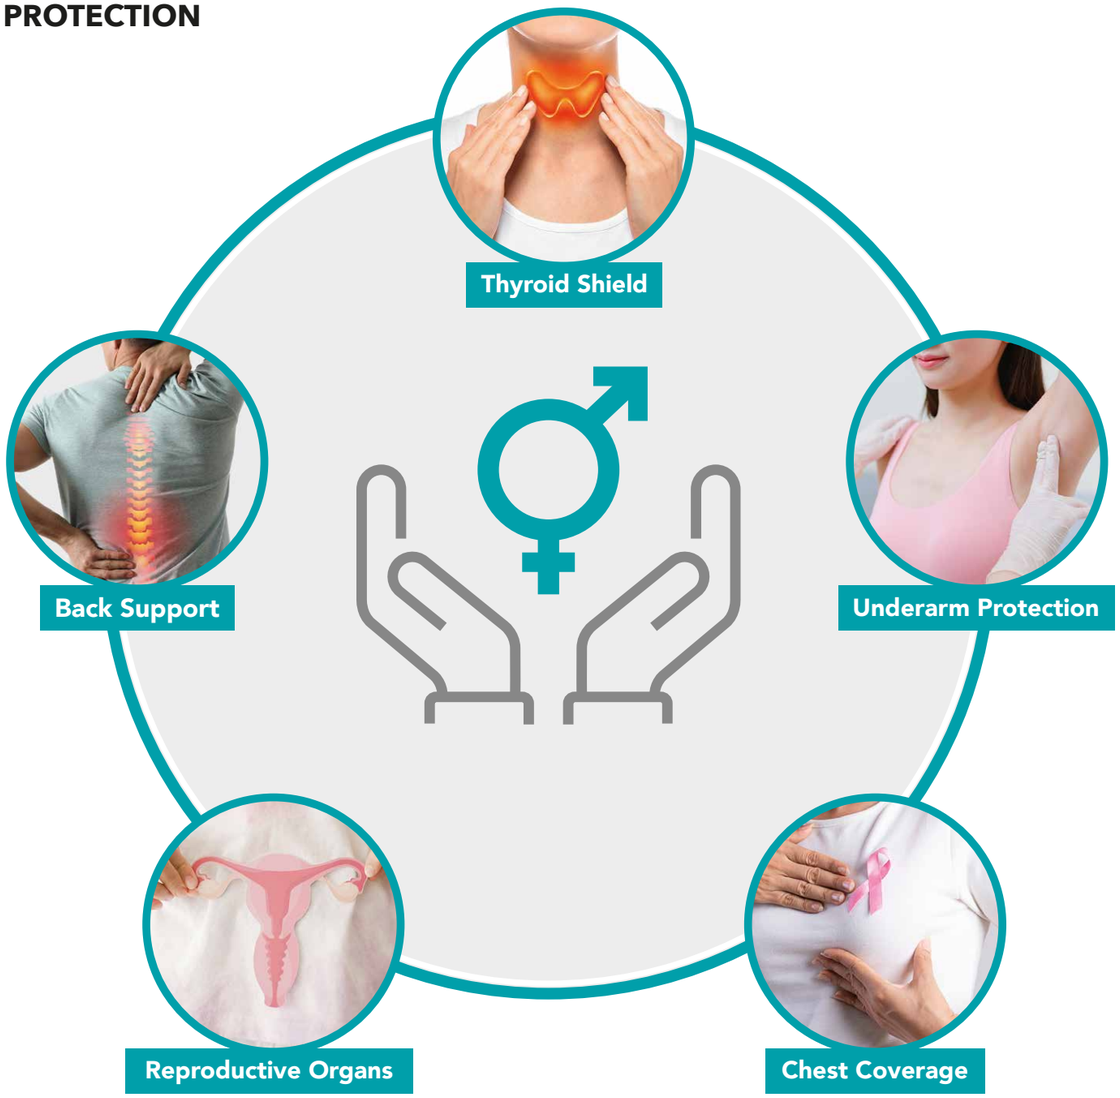

Protection, head to toe

BodyARMOUR is designed to provide comprehensive X-ray protection across key anatomical regions, including the thyroid, chest, underarms, reproductive organs and bone marrow.

The integrated **Back**SAVER technique redistributes garment weight, reducing the load on the back and shoulders by up to 50%.

Combining extended coverage with ergonomic weight distribution, **Body**ARMOUR is designed for greater comfort during prolonged procedures.

ADVANCED UNISEX PROTECTION

BodyARMOUR – Lightweight x-ray protection

BodyARMOUR's anatomical design provides integrated X-ray protection across key exposure-sensitive regions, minimizing the need for additional protective panels.

THYROID SHIELD
Dedicated neck shielding for the X-ray-sensitive thyroid gland.

CHEST COVERAGE
Extended frontal coverage for the chest and breast tissue.

UNDERARM PROTECTION
Additional side coverage for the axillary region.

REPRODUCTIVE ORGANS
Prevent radiation-induced fertility issues and ovarian cancer.

BACK SUPPORT
Reducing the strain of prolonged wear.

Recommended for complete protection to be used with eyewear.

BodyArmour is also available in temperature regulating & cooling mechanism by Outlast® designed for NASA space missions.
